Art Unit: 1627

**NOTE the change of examiner and art unit in this application.**

1. Claims 15-29, 36-37 are currently pending in this application.
2. Applicant's election without traverse of group II, claims 27-29, 36-37, in Paper No. 7, filed on 10/15/01 is acknowledged.
3. Claims 15-26 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b) as being drawn to a non-elected invention. Election was made **without** traverse in Paper No. 7.

Upon further consideration of the elected group claims, the following restriction is required for examination of this application.

**Please Note:** *In an effort to enhance communication with our customers and reduce processing time, a dedicated Fax machine is in place to receive your responses. The Fax number is 703-308-4315. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Jyothsna Venkat, Ph.D., Supervisory Patent Examiner at [jyothsna.venkat@uspto.gov](mailto:jyothsna.venkat@uspto.gov) or 703-308-2439. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.*

***Election/Restriction***

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 1627

I. Claims 27-29, drawn to a peptide display library, classified in class 435, subclass 5.

II. Claims 36-37, drawn to a kit for identifying the amino acid sequence of a polypeptide, classified in class 435, subclass 975.

5. The inventions are distinct, each from the other because of the following reasons:

6. Inventions of group I and group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the inventions of group I (phage display library) is used in the group II inventions ( a kit for identifying amino acids). The inventions of group II require other reagents with the phage display library such that the products are useful in identifying the amino acid sequence.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1627

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
9. Applicant is required to reply to this restriction requirement within 30 days of mailing this action. See MPEP 809.2(a).
